TITLE	Community School Profiles 1973-1974.
INSTITUTION	New York City Board of Education, Brooklyn, N.Y.
PUB DATE	Apr 75
NOTE	1,103p.; Not available in hard copy due to small print size of much of the document; For a related document, see EA 009 331
EDRS PRICE	MF-$2.00 Plus Postage. HC Not Available from EDRS.
DESCRIPTORS	Academic Achievement; *Community Schools; *Elementary Secondary Education; Expenditure Per Student; Instructional Staff; Mathematics; Reading Tests; *School Statistics; Student Characteristics; Student Enrollment; Student Teacher Ratio; *Tables (Data); Teacher Salaries; Teaching Experience
IDENTIFIERS	*New York (New York)

ABSTRACT

This publication of the New York City School Profiles provides detailed information to both professional staff and the public. The factors selected for inclusion are thought to be most indicative of the total school environment and of greatest concern to the educational community. The report presents a statistical overview of each of the elementary, intermediate, and junior high schools in the New York City Public School System. It contains a wide variety of 1973-1974 school year data describing the individual school plant, pupil characteristics and achievement levels, and staff position and costs. In addition to presenting data on individual schools, school level and geographic summaries are also provided. The complete School Profiles data file is also available on magnetic tape for computer processing and analysis. (Author/MLF)

FOREWORD

The more complex, creative and moral concepts of intelligence have not, and probably cannot be reduced to the level of the relatively simple techniques of measurement so far devised by psychologists.

Kenneth B. Clark, **PATHOS OF POWER**, 1974

It must be stressed that the data are complex, open to many issues of interpretation, and subject possibly to considerable reinterpretation in the light of different techniques of analysis.

Daniel P. Moynihan, **COPING**, 1973

The purpose of **School Profiles** is to support the school system's educational goals for all New York City youth.

This initial publication of the New York City **School Profiles** provides detailed information about our public schools to both professional staff and the public—parents, interested citizens, organizations, and other members of the educational community. A school is a complex organization and efforts to characterize schools by the use of quantitative data are never complete. The factors selected for inclusion in **School Profiles** are thought to be most indicative of the total school environment and of greatest concern to the educational community. While the initial data are for the 1973-1974 school year, these factors are not static. Some factors, such as average daily register and pupil attendance data, are based on a year's experience. Other variables, such as pupil ethnic composition and pupil/teacher ratio, describe the school at a point in time.

Education is currently without systematic information on the factors and processes associated with educational effectiveness. An analysis of the citywide reading achievement test scores reveals large differences in levels of academic performance for the New York City public schools. But while test results can indicate a school's level of pupil achievement, they cannot explain or improve the degree of performance. The publication of test scores generates several questions. How much of the achievement range can be attributed to variances in pupil and community background, or to other factors, particularly the educational programs in individual schools? What are the possible consequences of alternative resource allocations for pupil achievement?

Participation in the development of educational policy requires analyses beyond descriptive displays of data averages and frequency distributions. In addition to this publication, the complete **School Profiles** data file is available on magnetic tape for computer processing and analysis. Computerization will enable the educational analyst to develop multivariate statistical models of the educational process and to identify those school factors associated with educational achievement.

The **School Profiles** and its data file can support effective management. Used judiciously, it is a basis for analyzing our schools, for identifying successful programs and for improving others. Finally, it can contribute to the communication that must exist between each school and its community.

Bernard R. Gifford
Deputy Chancellor

DATA DEFINITIONS

This publication presents a statistical overview of each of the elementary, intermediate, and junior high schools in the New York City Public School System. It contains a wide variety of 1973-1974 school year data describing the individual school plant, pupil characteristics and achievement levels, and staff positions and costs. In addition to presenting data on individual schools, the **School Profiles** also provides data for the following school level and geographic summaries:

Summary by Title I Status within Level within District
Summary by Level within District
Summary by Title I Status within District
Summary by District
Summary by Level within Borough
Summary by Title I Status within Level within City
Summary by Level within City

This publication was developed and prepared by the Educational Policy Development Unit in the Office of the Deputy Chancellor. The data on physical facilities were obtained from the Office of Educational Facilities Planning. Data on pupil enrollment, ethnic composition, language ability, attendance, promotions, free lunch eligibility, admissions and departures, and teacher absence were obtained from the Office of Educational Statistics. Standardized achievement test scores in reading and mathematics were supplied by the Office of Education Evaluation. School staff position and cost data were generated by computer systems developed by the Educational Policy Development Unit. Electronic data processing services used in the production of the school profiles were provided by the Bureau of Management Information and Data Processing.

The **School Profiles** project grew out of research on identifying unusually effective schools begun by Bernard R. Gifford, Deputy Chancellor, while at the New York City-Rand Institute. The **School Profiles** computer system and data report formats were developed jointly by Bernard R. Gifford, and Richard Vigilante, Leon Brazel, Soren Smith and Jeffry Lee of the **School Profiles** Project Team.

Cover design and photographs were produced by Jackie Wong and Howie Roberts of the Audio-Visual Training Unit of the Division of Personnel.

ERIC

5

PHYSICAL FACILITY DATA

The following physical facility data are included for each individual school organization:

LEVEL

Level defines a category of schools having similar grades or types of pupils. For the **School Profiles** the following levels have been used:

Elementary Schools
Junior High/Intermediate Schools

TITLE I STATUS

A school is eligible to receive additional educational services under Title I of the Federal Elementary and Secondary Education Act (ESEA) if its percentage of low-income pupils is equal to or greater than the citywide percentage of low-income pupils. The percentage of low-income pupils is determined by dividing the school's October 31, 1973 register into the weighted sum of free lunch eligible pupils enrolled in the school and children aged 5 to 17 receiving Aid to Families with Dependent Children (AFDC) payments.

For the 1973-1974 school year, the following formulae were used to determine the city-wide low income cutoff percentage and the low income percentage for each New York City public school:

1. **City-wide Cutoff (C.W.C.)**

$$C.W.C. = \frac{\text{The number of Children Ages 5-17 on AFDC Welfare Rolls (weighted 60\%) plus the number of Public School Pupils receiving Free Lunch (weighted 40\%)}}{\text{Total number of Children on Public and Nonpublic School Registers, Institutionalized and Dropouts as of October 31, 1973}} \times 100$$

2. **Eligibility of a New York City Public School (P.S.E.)**

$$P.S.E. = \frac{\text{The number of Children in Age Span Appropriate to the School's Attendance Area on AFDC Welfare Rolls (weighted 60\%) plus the number of Pupils in the School receiving Free Lunch (weighted 40\%)}}{\text{Total Number of Public School Children registered in the Schools as of October 31, 1973}} \times 100$$

A public school will be eligible for ESEA Title I services for 1973-1974 if its low-income percentage (P.S.E.) is equal to or greater than the citywide low-income cutoff percentage (C.W.C.) of 26.8%.

ADDRESS

TELEPHONE NUMBER

NO. OF ANNEXES

An annex is any educational space assigned to a school organization but not housed in the main school building. For the **School Profiles**, only annexes housed in regular school buildings are counted. Annexes housed in portable classrooms, mini-schools or any leased space are not included in the annex data.

YEARS OF CONSTRUCTION, ADDITION AND MODERNIZATION

Dates apply to main building only.

Main building year of construction dates for the various level and district summaries are presented by the number of schools in the summary having construction dates within each of the following intervals:

Before 1900
Between 1900 and 1929
Between 1930 and 1959
1960 and later

TYPE OF CONSTRUCTION

There are four categories of construction for N.Y.C. public school buildings:

Fireproof Throughout
Structurally Fireproof
Interior Framing not Fireproof
Mixed (any combination of the above categories)

Main building type of construction data for the various level and district summaries are presented by the number of schools in the summary having construction types within each of the four above categories.

CAPACITY

Capacity is the ideal number of pupils that can be physically accommodated in a school given its educational program. School capacity is computed annually in October based on a survey of the number of instructional rooms and the use made of these rooms. Factors considered in the computation of a school's capacity include the number and type of classes organized, class size requirements for the pupil populations, and special programs and activities. For the **School Profiles**, the capacity of temporary buildings such as portable classrooms, mini-schools and leased space has not been included with that of the main building and other school building annexes.

PERCENT UTILIZATION

Percent Utilization is a measure of the percent usage of a school building in relation to its rated capacity. Utilization is computed by dividing the October 31, 1973 register into the school capacity as determined by the October 1973 survey. The capacity figure used in the **School Profiles** excludes the capacity of all temporary buildings in displaying capacity for the school organization. Pupil registers for individual school organizations include all buildings however. Therefore, for those schools where the register and capacity data do not involve the same structures, the percent utilization has not been calculated. Reference should be made to the following Board of Education publication for a more detailed discussion of school capacity data:

Utilization of School Buildings
1973-1974 School Year
Office of Educational Facilities Planning

School Utilization data for the various level and district summaries are presented by the number of schools in the summary having utilization rates within each of the following intervals:

Less than 80 percent
Between 80 and 99 percent
Between 100 and 119 percent
120 percent and over

PUPIL DATA

REGISTER (10/31/73)

Register is the number of pupils enrolled in school on the last school day in October. Register includes all pupils (pre-kindergarten, kindergarten, regular and special education classes) counted on the individual school organization's rollbook in all facilities (main building, annexes, portable classrooms, leased space and other auxiliary structures). For most schools, the October 31 register will represent the largest number of pupils within the school at any given point in time during the school year.

AVERAGE DAILY REGISTER FOR SCHOOL YEAR 1973-1974

Average Daily Register is the sum of the daily registers during the school year divided by the number of days in the school year. For 1973-1974, there were 184 days for schools in Manhattan, Bronx and Richmond, and 183 school days in Brooklyn and Queens. Since the enrollment at a school will vary continuously with the admissions and departures of pupils during the year, the average daily register may be more indicative of a school's pupil population than is the October 31 register.

ETHNIC COMPOSITION (BY TYPE OF CLASS)

Ethnic Composition is the racial or ancestral composition of the pupil population registered at a school as of October 31, 1973. The pupil ethnic data are collected for each classroom by teacher observation only. Teachers are instructed not to ask any pupil his or her race or ancestry. Where the race or ancestry of some pupils is not clear, the teacher is to choose the classification that, in the teacher's judgment, best fits the individual based on current social definitions. The criterion is this: "Does the school or community consider this pupil to be Black, Puerto Rican, American Indian, Spanish Surnamed American, Oriental or from some other ethnic group?" The definitions given below are those used by both New York City and New York State:

Black — Pupils considered to be of African or Afro-American origin.

American Indian — Pupils considered to be of American Indian origin.

Oriental — Pupils considered to be of Chinese, Japanese, or other Oriental origin.

Puerto Rican — Pupils considered to be of Puerto Rican origin.

Other Spanish — Pupils considered to be of Mexican, Central American, or other Spanish speaking origin.

Other — Pupils not classifiable in any of the above categories.

The pupil ethnic data are displayed by number and percent of pupils across rows for pre-kindergarten, kindergarten, regular classes, special education classes, and total of all classes.

ABILITY TO SPEAK ENGLISH (BY LINGUISTIC BACKGROUND)

Ability to Speak English is the ability of pupils to speak and understand English by proficiency category and language group as of October 31, 1973. Language data are collected by the classroom teacher at the same time as the pupil ethnic data. In the October 31, 1973 language survey, a widely used pupil rating instrument was the Office of Bilingual Education's "Scale A, for Rating Pupil's Ability to Speak English" and "Scale B, for Rating Pupil's Ability to Understand Spoken English." However, many classroom teachers used their overall judgment of each pupil's English proficiency as the sole basis for their ratings.

The language survey classifies all pupils in a school into one of the following linguistic background groups:

Group 1 — English Speaking Pupils who are not Puerto Rican
Group 2 — All Puerto Rican Pupils
Group 3 — Other Spanish Speaking Pupils who are not Puerto Rican
Group 4 — Chinese Speaking Pupils
Group 5 — Italian Speaking Pupils
Group 6 — Greek Speaking Pupils
Group 7 — French Speaking Pupils (including Haitians)
Group 8 — Other Non-English Speaking Pupils who are not in any of the above groups

The pupils in each of these eight groups are placed into the following English-Proficiency categories:

Poor — Pupils who speak little or no English, or whose regional or foreign accents make it impossible, or almost impossible, for them to be understood.

Hesitant — Pupils who speak English hesitantly at times, or whose regional or foreign accents indicate the need for remedial work in English and/or speech.

Fluent — Pupils who speak English fluently for their age levels, with no severe foreign or regional accents.

The pupil language data are displayed by number and percent of pupils across rows for the three proficiency categories and total of all categories.

ATTENDANCE (PERCENT OF AVERAGE DAILY REGISTER)

Percent Attendance is the mean pupil attendance rate for the 1973-1974 school year. Percent Attendance is calculated by dividing the average daily register into the average daily attendance. Pupil attendance data are collected monthly for each of ten attendance periods in the school year. Each month's aggregate register and aggregate attendance are totaled over the ten periods and divided by the number of school days in the year to yield average daily registers and attendance.

$$\text{Percent Attendance} = \frac{\text{Average Daily Attendance}}{\text{Average Daily Register}} \times 100$$

Pupil Attendance data for the various level and district summaries are presented by the number of schools in the summary having attendance rates within each of the following intervals:

Less than 60 percent
Between 60 and 69 percent
Between 70 and 79 percent
Between 80 and 89 percent
90 percent and over

PROMOTIONS (PERCENT OF JUNE 1973 REGISTER)

Promotion rates are provided for elementary, intermediate and junior high schools only. Percent Promotions are calculated by dividing the June 26, 1974 register into the number of pupils promoted in June into a higher grade. Mentally handicapped pupils are not graded and do not "advance" by grade level. Such pupils are therefore excluded when calculating promotion rates.

$$\text{Percent Promotions} = \frac{\text{Number of Promotions}}{\text{June 26, 1974 Register}} \times 100$$

Pupil Promotion data for the various level and district summaries are presented by the number of schools in the summary having promotion rates within each of the following intervals:

Less than 80 percent
Between 80 and 84 percent
Between 8[illegible] 90 percent
Between 9[illegible]ercent
95 percent

FREE LUNCH ELIGIB[illegible] (PERCENT OF 10/31/73 REGISTER)

Percent Free Lunch Eligible Pupils is the number of pupils eligible to receive free lunch as of September 28, 1973 divided by the October 31, 1973 register. Under U.S. Department of Agriculture regulations, pupils are eligible for free school lunches due to low family income ($102.10 gross weekly for a family of four) or due to special hardship costs (such as excessive medical expenses) where the family income exceeds the U.S.D.A. income scale.

In a few schools, the percent of free lunch eligible pupils will exceed 100%. This is due to changes in school registers during the school year. For those schools where the percent of eligible pupils exceeds 100%, the number of eligible pupils in school on September 28, 1973 was greater than the total number of pupils in school in October 31, 1973.

$$\text{Percent Free Lunch Eligibles} = \frac{\text{Free Lunch Eligible Pupils as of 9/28/73}}{\text{October 31, 1973 Register}} \times 100$$

Free lunch eligibility data for the various level and district summaries are presented by the number of schools in [illegible]e summary having free lunch eligibility rates within each of the following intervals:

Less than 20 percent
Between 20 and 39 percent
Between 40 and 59 percent
Between 60 and 79 percent
80 percent and over

ADMISSIONS

Percent Admissions are the number of pupils admitted into a school during the 1973-1974 school year divided by the average daily register for that year. Admissions include both pupils transferring in from another New York City public school and pupils being admitted from all other schools.

$$\text{Percent Admissions} = \frac{\text{Number of Pupils Admitted during 1973-1974}}{\text{Average Daily Register}} \times 100$$

Pupil admissions data for the various level and district summaries are presented by the number of schools in the summary having admission rates within each of the following intervals:

Less than 20 percent
Between 20 and 39 percent
Between 40 and 59 percent
Between 60 and 79 percent
80 percent and over

DEPARTURES

Percent Departures are the number of pupils leaving a school during the 1973-1974 school year divided by the average daily register for that year. Departures include pupils transferring out to another New York City public school, as well as pupils transferring to any other school or leaving school entirely.

$$\text{Percent Departures} = \frac{\text{Number of Pupils Discharged during 1973-1974}}{\text{Average Daily Register}} \times 100$$

Pupil Departures data for the various level and district summaries are presented by the number of schools in the summary having departure rates within each of the following intervals:

Less than 20 percent
Between 20 and 39 percent
Between 40 and 59 percent
Between 60 and 79 percent
80 percent and over

READING SCORES

Reading scores are provided for elementary, intermediate and junior high schools only. The citywide standardized Metropolitan Achievement Tests (MAT) in reading were administered in April 1974 for the second through the ninth grades. This standardized examination makes possible a comparison of the reading ability of New York City public school pupils with the ability of pupils throughout the nation.

Pupil reading scores are given in grade equivalent units. For each pupil, the number of correct answers is converted to a grade equivalent score on the basis of tables developed when the test was standardized on a national sample of pupils. The ten months of the school year represent tenths of a grade equivalent score. For example, for a third grade test given in the beginning of April, the norm grade equivalent score is 3.7, since early April is the 7th complete month of one year's reading instruction. A third grade pupil who attains a grade equivalent score of 3.7 has equalled the performance, in terms of the number of correct answers, of the average child in the national sample of children on whom the test was standardized. For any large group of pupils tested, there will result a relatively wide range of grade equivalent scores above and below the mean. In the national sample, 50% of the pupils in a grade fall below the norm and 50% above the norm.

The Metropolitan Achievement Test in Reading consists of two parts. Part 1 — Word Knowledge is intended as a measure of pupils' vocabulary. The "vocabulary" of interest is that which pupils encounter in their ordinary school work, exclusive of special technical terms in mathematics, science, and social studies. Part 2 — Reading Comprehension is intended as a measure of comprehension of connected discourse presented in a printed medium. This part measures the fundamental objective of the reading curriculum. In the test, pupils read a paragraph, then answer questions based on the paragraphs. At the lowest grade levels, the paragraphs are composed mainly of simple sentences and elementary vocabulary. Gradually, the paragraphs increase in length, sentence structure becomes more complex, and the vocabulary load is increased. At the highest levels, pupils are required to read several paragraphs on a single topic, then answer questions.

For each grade tested in a school, the following pupil reading data are provided:

- Number of pupils taking the test. This number is generally lower than the pupil register as a certain number of pupils are either absent on test day or are excluded from the test due to English speaking difficulty.
- Mean grade equivalent score for Part 1 — Word Knowledge. Calculated by dividing the sum of the individual pupil mean grade equivalent scores by the number of pupils tested.
- Mean grade equivalent score for Part 2 — Reading Comprehension.
- Mean grade equivalent score for total Reading Test, Parts 1 and 2.
- Standardized norm grade equivalent for grade and test date.
- Percent of pupils tested scoring at or above the norm grade equivalent.
- Percent of pupils tested scoring one year or more below norm grade equivalent.
- Percent of pupils tested scoring two years or more below norm grade equivalent. Not applicable for second grade pupils.

MATH SCORES

Math scores are provided for elementary, intermediate and junior high schools only. The citywide standardized Metropolitan Achievement Tests (MAT) in mathematics were administered in April 1974 for the third, fifth and eighth grades. As with the reading scores, the pupil math scores are given in grade equivalent units.

The Metropolitan Achievement Test in Mathematics consists of three parts. Part 1 — Computation is designed to give straightforward assessment of the pupil's ability to work with numbers. The grade levels progress in difficulty from simple number facts in the basic operations to the use of fractions, decimals, percents, and, at the highest levels, simple equations, powers, and exponents. Part 2 — Concepts evaluates the pupil's knowledge of fundamental principles and relationships in mathematics. Part 3 — Problem Solving evaluates the pupil's ability to reason with numbers and operations. It presents the pupil with everyday problems in consumer economics, practical measurement and geometry, and other typical situations requiring numerical ability.

For each grade tested in a school, the following pupil math data are provided:

- Number of pupils taking test.
- Mean grade equivalent score for Part 1 — Computation.
- Mean grade equivalent score for Part 2 — Concepts.
- Mean grade equivalent score for Part 3 — Problem Solving.
- Mean grade equivalent score for total Mathematics test, Parts 1, 2 and 3.
- Standardized norm grade equivalent for grade and test date.
- Percent of pupils tested scoring at or above the norm grade equivalent.
- Percent of pupils tested scoring two years or more below norm grade equivalent.

STAFF DATA

POSITION TITLES

Annual pedagogic positions by title assigned to each school as of the November 1973 payroll. Included in the positions are all regular, regular substitute [illegible] per diem substitute personnel. Excluded from the positions are all per[illegible] terminal, maternity and all other paid and non-paid leaves of absence.

The positions displayed for all schools other than high sc[illegible]

- Principal
- Assistant Principal (Administration)
- Teacher
- Guidance Counselor (including School Psychologist and Social Worker)
- School Secretary
- Other Professional (including Laboratory Specialist, Library Assistant and Laboratory Technician)

Position and salary data are provided for each title by tax levy (city) and reimbursable (State and Federal) funding, and total of both funding sources. Average annual salaries are calculated by dividing the total number of positions for each title into the respective total annual salary dollars. All salary information represent November 1973 salary rates annualized for the twelve-month 1973-1974 school year. These annual salary data, therefore, do not include any salary rate and staff changes that occurred during the 1973-1974 school year previous or subsequent to the November 1973 payroll.

Pupil/Staff ratio is calculated for each title by dividing the total number of annual positions for the title into the October 31, 1973 register. Staff cost per pupil is calculated for each title by dividing the October 31, 1973 register into the total annual salary dollars for each title.

All cost data provided in the **School Profiles** are for salaries only. Fringe Benefit costs for Health and Welfare, Social Security and Pension Plans are not included.

Payroll data do not always provide a true picture of the number of positions serving in a school. Some personnel charged to one school's payroll may actually be assigned to another school or to a district office. Payroll data also do not reflect the assignment status of some acting supervisors. A school in which an assistant principal is serving as an acting principal may be shown as having no principal. Most acting supervisors, however, are paid out of their assignment position payroll line and their status will be shown correctly in the **School Profiles**.

HOURLY TITLES

Personnel assigned to the schools as of the November 1973 payroll who are paid on an hourly basis. The hourly positions displayed for all schools are:

- Instructional Paraprofessional (including Teacher Aide, Educational Assistant, Educational Associate, and Auxiliary Trainer)
- Security Guard (including Student Service Officer)
- Other Hourly (including School Aide, School Lunch Helper, Parent Program Assistant, Family Worker, Family Assistant, and Family Associate)

Hours and salary (hourly rate) data are provided for each hourly title by tax levy (city) and reimbursable (State and Federal) funding, and total of both funding sources. Average hourly rates are calculated by dividing the total number of hours for each title into the respective total hourly dollars. All hourly title salary information represent November 1973 salary rates annualized for a 180-day school year. These hourly salary data, therefore, do not include any salary rate and staff changes that occurred during the 1973-1974 school year previous or

subsequent to the November 1973 payroll.

Pupil/Staff ratio is calculated for each hourly title by dividing the total number of hours for the title into the October 31, 1973 register. (Hourly title cost per pupil is calculated for each title by dividing the October 31, 1973 register into the total hourly dollars for each title.)

All hourly cost data provided in the **School Profiles** are for salaries only. Fringe benefits costs are not included.

STAFF COST PER PUPIL

The total annual position and hourly title salary dollars (excluding fringe benefits) divided by the October 31, 1973 register.

Total staff cost per pupil data for the various level and district summaries are presented by the number of schools in the summary having total per pupil staff costs within each of the following intervals:

Less than $600 per pupil
Between $600 and $899 per pupil
Between $900 and $1,199 per pupil
Between $1,200 and $1,499 per pupil
$1,500 per pupil and over

PUPIL/TEACHER RATIO

The Pupil/Teacher Ratio is the total number of teacher positions divided into the October 31, 1973 register.

Pupil/teacher ratio data for the various level and district summaries are presented by the number of schools in the summary having pupil/teacher ratios within each of the following intervals:

Less than 15 pupils per teacher
Between 15 and 17.9 pupils per teacher
Between 18 and 20.9 pupils per teacher
Between 21 and 23.9 pupils per teacher
24 pupils per teacher and over

TEACHER ABSENCE RATE

Teacher Absence Rate is the number of days of teacher absences divided by the total possible number of teacher-days for the 1973-1974 school year. The teacher absence rate includes Medical Certificate, Self-Treated and Personal Business absences.

$$\text{Teacher Absence Rate} = \frac{\text{Number of Days of Teacher Absences}}{\text{Total Number of Teacher-Days}} \times 100$$

Teacher absence rate data for the various level and district summaries are presented by the number of schools in the summary having teacher absence rates within each of the following intervals:

Less than 3 percent
Between 3 and 4.9 percent
Between 5 and 6.9 percent
Between 7 and 8.9 percent
9 percent and over

PERCENT OF TEACHERS WITH 5 OR MORE YEARS EXPERIENCE

The percent of regular and regular substitute teachers assigned to a school as of the November 1973 payroll having five or more years of total teaching experience (in either the N.Y.C. public schools or any other school).

Teacher experience rate data for the various level and district summaries are presented by the number of schools in the summary having percentages of teachers with 5 or more years experience within each of the following intervals:

Less than 50 percent
Between 50 and 69.9 percent
Between 70 and 79.9 percent
Between 80 and 89.9 percent
90 percent and over

REGULAR TEACHERS ON SALARY SCHEDULE

The number and percent of regular and regular ...sti... ...hers assigned to a school as of the November 1973 payroll who are paid on the ... ...alary schedules according to their educational background:

Schedule C-1 — Salary rates paid to teachers who have less than thirty semester hours of approved study beyond the baccalaureate degree. For the 1973-1974 school year, the C-1 salary schedule ranged from $9,600 to $15,750 in sixteen semi-annual steps.

Schedule C-2 — Salary rates paid to teachers who have completed thirty semester hours of approved study beyond the baccalaureate degree, or who hold an approved masters degree issued by a recognized college or university. For the 1973-1974 school year, the C-2 salary schedule ranged from $10,000 to $16,250 in sixteen semi-annual steps.

Schedule C-6 — Salary rates paid to teachers who hold an approved doctorate issued by a recognized college or university, or who hold an approved master's degree and in addition have completed thirty semester hours of approved study beyond the baccalaureate degree, or who have completed sixty semester hours of approved study beyond the baccalaureate degree. For the 1973-1974 school year, the C-6 salary schedule ranged from $11,850 to $18,000 in sixteen semi-annual steps.

In the **School Profiles**, teachers appointed prior to July 1, 1947 and on the IIa salary schedule ($19,250 annual salary for the 1973-1974 school year) have been included with teachers on the C-6 salary schedule.

SOME NOTES ON COST AND STAFF DATA

All cost and staff data provided in the **School Profiles** are derived from a number of November 1973 payroll tapes. The November 1973 payroll data are annualized (multiplied by twelve) to generate cost and staff data for the entire 1973-1974 school year. These annualized cost and staff data in the **School Profiles**, therefore, do not include any salary rate and staff changes that occurred during the 1973-1974 school year previous or subsequent to the November 1973 payroll period.

Again, payroll data do not always provide an accurate picture of the number of positions serving in a school. The analyst of **School Profiles** data should remember these points:

1. Many new or transferred staff will begin working in a school before actually appearing on the school's payroll. This is because the normal processing time for a new employee's personnel and payroll records may be from three to six weeks. The November 1973 payroll period was selected for use in the **School Profiles** so that cost and staff data would correspond as closely in time as possible to the October 31, 1973 pupil data. It is possible that, for a number of schools, a few staff positions were not reflected on the schools' payroll until the December 1973 or January 1974 payrolls. In such instances, the schools' pupil/staff ratios in the **School Profiles** would appear higher than they actually were. Similarly, the schools' per pupil costs would appear lower than they actually were.

   The data biases caused by this payroll processing time lag may be particularly severe in the case of some new schools. The table below shows how the processing of incoming teachers in a new school affects the school's pupil/teacher ratio.

NEW SCHOOL 1973-1974 PAYROLL

	OCT.	NOV.	DEC.	JAN.
Pupils	550	550	550	550
Actual Teachers	20	20	20	20
Actual Pupil/ Teacher Ratio	27.5	27.5	27.5	27.5
Teachers on Payroll	10	15	19	20
Calculated Pupil/ Teacher Ratio	55.0	36.7	29.0	27.5

   For this school the **School Profiles** would indicate a pupil/teacher ratio of 36.7 when the actual pupil/teacher ratio was 27.5. Although data discrepancies such as this are few in the **School Profiles**, the analyst is advised to exercise good judgment and to question or exclude those data elements having extreme values.

2. Instructional service monies for the 1973-1974 school year were allocated by objective formulae to the thirty-two Community School Districts partly on the basis of pupil registers as of October 31, 1972. For some districts, the October 31, 1973 may have exceeded the 1972 register. This would have resulted in somewhat higher pupil/staff ratios and lower per pupil costs for schools in these districts at the start of the 1973-1974 school year. When October 31, 1973 registers became available, additional instructional service monies were allocated to these districts to make up for any staff deficiencies. These additional allocations were made in December 1973 and would not be reflected in the **School Profiles** data.

3. Pupil/teacher ratios are calculated by dividing the number of teachers on the November 1973 payroll into the October 31, 1973 pupil register. As a measure of instructional

service, the pupil/teacher ratio is sometimes confused with the average class size. Teacher workload factors result in differences between the two measures, however.

The classroom teacher's workday is separated into teaching, preparation, and administrative periods. The number of teaching periods allowed varies by level and by Title I or Non-Title I status. When a teacher is taking a preparation or administrative period, another teacher must be assigned to cover the class. Teachers at the elementary level have 5 preparation periods per week in Title I schools and 2 preparation periods per week in Non-Title I schools. Teachers at the junior high/intermediate level have 8 preparation periods per week in Title I schools and 5 preparation periods per week in Non-Title I schools. The total number of teachers required per class is therefore equal to one regular teacher plus a portion of an additional preparation teacher.

The impact of this additional preparation period coverage on pupil/teacher ratios is given below:

LEVEL	TITLE I STATUS	MAXIMUM CLASS SIZE	TEACHERS PER CLASS	MAXIMUM PUPIL/TEACHER RATIO
Elementary	Title I	32	1.25	25.60
Elementary	Non-Title I	32	1.10	29.09
Junior High	Title I	30	1.59	18.86
Junior High	Non-Title I	30	1.40	21.43

The variation in pupil/teacher ratios shown in the **School Profiles** is partly the result of additional preparation period coverage and should not be interpreted as resulting entirely from variations in the level of instructional service or class size.

4. Per pupil costs are calculated by dividing the October '31, 1973 pupil register into the total staff annual salary cost. Computed in this fashion, the per pupil cost data in the **School Profiles** provide a "snapshot" measure of instructional service within a school. Since the enrollment at a school will vary continuously with the admissions and departures of pupils during the year, the school's per pupil costs will also vary continuously.

   To the extent that per pupil cost may be considered an aggregate measure of instructional service, it should be remembered that services can only be provided to those pupils who are **in attendance** at a school as well as being **on register**. Computing a measure of service on the basis of actual conditions can have a significant effect on the quantitative value of the measure. For example, Title I elementary schools have an average per pupil cost of $967 and Non-Title I elementary schools have an average per pupil cost of $808. These per capita costs are based on the number of pupils **on register**. When adjusted for pupil attendance, however, the Title I per capita cost becomes $1,138 and the Non-Title I cost becomes $904. For some analyses, the adjusted per capita cost may be a more accurate measure of instructional service than the unadjusted per capita cost.

5. Data on hourly titles (Instructional Paraprofessionals, Security Guards and Other Hourly Employees) were taken from a separate November 1973 hourly payroll tape. Coding inconsistencies on this tape have resulted in the erroneous identification of hourly titles by funding source (tax levy and reimbursable) in the **School Profiles**. Instructional Paraprofessionals, for example, are all included in the reimbursable funding category, when a number of these titles are funded by tax levy. Security Guards, also included in the reimbursable category, are entirely funded by tax levy sources.

   The coding errors do not affect the accuracy of the **total** hour and cost data for the hourly titles in the **School Profiles**. Because of the coding problem, however, comparative analyses of position or cost data by separate funding source should be made for annual position titles **only**. Such analyses should not include hour or cost data for the hourly titles. Analyses of position or cost data by total of both funding sources may include hourly as well as annual data.
